Hi-D ADEK
GUMMIES[®]

THE ESSENTIALS
plus Zn and extra Vitamin D

orange

- 

MVW ADEK Hi-D GUMMIES are specifically formulated to meet the dietary needs of individuals who have difficulty absorbing fat and fat soluble vitamins, as seen in cystic fibrosis.
- 

MVW ADEK Hi-D GUMMIES provide the essential fat-soluble vitamins A, D, E, and K in a water miscible formulation plus zinc. This product also contains the antioxidants beta-carotene, alpha-tocopherol, and zinc. The source of the vitamin D3 is "non-animal." The product is vegetarian.
- 

MVW ADEK Hi-D GUMMIES contain the same amounts of the fat-soluble vitamins A, E, and K, and zinc as found in the standard MVW ADEK GUMMIES for routine dosing, but provide 125 mcg (5000 IU) of D3 per serving (2 Gummies) to meet the "Step 2" dose increases recommended by the CF Foundation's September 2010 Ad Hoc Committee recommendations.[†]
- 

MVW ADEK Hi-D GUMMIES are covered by The HealthWell Foundation vitamin & supplements grant.
